

## Bio-Desolve Wastewater Treatment in Anaerobic Digesters:

- Increases volumes of clean methane produced by the digester by up to 60%
- Significantly reduces septic odours
- Lowers operating costs while extending the life and increasing the capacity of all waste management systems
- Increases volumes & quality of decantable supernate
- Accelerates bio-digestion of solids by up to 50% based on volume and weight
- Reduces hauling and disposal fees
