Re:	Product Name	File Number	Registration Number
	LX7 Fulvic	49613NR	2020132A
	LX7 Soil Mix	49710NR	2020133A

Ms. Dickenson,

We have completed our review of the above-mentioned products. Based on the information that the Fertilizer Safety Section (FSS) of the Canadian Food Inspection Agency has reviewed, we have determined that these products meet all requirements as outlined in the *Fertilizers Act and Regulations* and may be legally sold in Canada. Therefore, the above products have been granted registration under the *Fertilizers Act* until **November 19, 2023**. **All labels associated with these products found in the marketplace must contain the registration number stated above.**

Enclosed with this letter, you will find a copy of the signed registration certificates and a copy of the approved labels. **Please ensure that the actual product labels found in the Canadian marketplace are the same as the enclosed label.** Please be advised that the presence of the CFIA stamp, on the final label is only as a symbol of approval and the reproduction or use of the CFIA stamp on labels in the marketplace is prohibited and subject to enforcement if found in the marketplace. Please note that all products are required to bear a lot/batch number on the product label. As well, please ensure that all advertising claims regarding the benefits of this product are limited to those identified on the approved label.

Please note that as new regulations and/or policies are developed, the acceptability of this product under the *Fertilizers Act and Regulations* may also change. It is the responsibility of the manufacturer/registrant/distributor/retailer to ensure that the product and the label continue to meet the requirements for sale in Canada, as outlined in the *Fertilizers Act and Regulations*.

Please be aware that any changes to the label, chemical composition and/or constituent materials of the product must be notified and submitted for approval to the FSS before implementation of the proposed change.

The FSS will accept re-registration submissions up to six months prior to expiration if there are no changes to the constituent materials or manufacturing process from the previous registration, and up to one year in advance if there are changes to the constituent materials or manufacturing process. **The registrant must ensure that they are aware of the date that the product expires (found on registration certificate), and to submit their re-registration application on, or before, the stated expiry date.**

If you require assistance to submit a re-registration, please contact the Pre-market Application Submissions Office (PASO) by telephone at: 1-855-212-7695, by e-mail at: cfia.paso-bpdpm.acia@canada.ca (ensure the word "fertilizer" is in the subject line) or visit our website at the following:

<http://www.inspection.gc.ca/english/plaveg/fereng/ferenge.shtml>

Please contact me should you have any questions regarding this registration letter.

Sincerely,

Isabelle Gosselin M. Sc.
Senior Evaluator
Fertilizer Safety Section

SCHEDULE III
(Subsection 5(2))

49710NR

FERTILIZER OR SUPPLEMENT REGISTRATION APPLICATION

Farm Fertilizer Registration
 Fertilizer - Pesticide Registration
 Micronutrient Registration
 Supplement Registration

Submit along with 1 copy of the label and applicable registration fee to:
 Pre-market Application Submissions Office (PASO)
 Canadian Food Inspection Agency
 59 Camelot Drive, Ottawa, ON K1A 0Y9 Canada
 Fax: 613-773-7115

APPLICATION

In compliance with the *Fertilizers Act*, application is hereby made for the registration of a fertilizer or supplement, the following particulars of which are hereby declared to be true and complete.

Brand (if any)

Name and/or Grade (Include the grade of the fertilizer and percentage and name of pesticide)
 LX7 Soil Mix / Mélange de sol LX7 etc.

Constituent Materials (Give the complete name of each ingredient incorporated in the fertilizer or supplement) (field will expand as required)
 Fulvic Acid (Leonardite Coal and citric acid), and Ammonium Sulfate

Other Qualities (Specify physical characteristics and method of manufacture) (field will expand as required)
 Fulvic Acid is placed into a washed and sanitized stainless steel mixer and while agitating continuously, Ammonium Sulfate is added and left to mix for 3 hours before it is passed through a 100 mesh screen filter and decanted into clean, sanitized containers for distribution.
 pH 3.3
 Relative Density 1.1

GUARANTEED ANALYSIS

Nitrogen (N)		Available Phos. Acid (P ₂ O ₅) (Min. %)	Soluble Potash (K ₂ O) (Min. %)	Magnesium (Mg) (Min. %)	Pesticide / Active Ingrid. (Actual %)
Total (Min. %)	Other (Min. %)				
8.5					
Calcium (Ca) (Min. %)	Sulphur (S) (Min. %)	Boron (B) (Actual %)	Manganese (Mn) (Actual %)	Zinc (Zn) (%)	Supplement Active Ingrid. (Min.)
	11.5				
Iron (Fe) (Actual %)	Copper (Cu) (Actual %)	Chloride (Cl) (Actual %)	Molybdenum (Mo) (Actual %)	Other (%)	Fulvic Acid 0.09
