Product name	File Number	Registration Number
Crop Pro Gold – Soil Carbon Mix	48841NR	2020028A
Turf Pro Gold – Soil Carbon Mix	48842NR	2020029A
Lawn Pro Gold – Soil Carbon Mix	48843NR	2020030A

Mr. McKichan,

We have completed our review and based on the information that the Fertilizer Safety Section of the Canadian Food Inspection Agency has reviewed, we have determined that these products meet all requirements as outlined in the *Fertilizers Act* and *Regulations* and may be legally sold in Canada. Therefore, the above products have been granted registration under the *Fertilizers Act* until **April 9, 2023**. All labels associated with this product found in the marketplace must contain the registration number stated above.

Enclosed with this letter, you will find a copy of the signed registration certificates and a copy of the approved labels. Please ensure that the actual product labels found in the Canadian marketplace are the same as the enclosed label. Please be advised that the presence of the CFIA stamp, on the final label is only as a symbol of approval and the reproduction or use of the CFIA stamp on labels in the marketplace is prohibited and subject to enforcement if found in the marketplace. Please note that all products are required to bear a lot/batch number on the product label. As well, please ensure that all advertising claims regarding the benefits of this product are limited to those identified on the approved label.

Please note that as new regulations and/or policies are developed, the acceptability of this product under the *Fertilizers Act* and *Regulations* may also change. It is the responsibility of the manufacturer/registrant/distributor/retailer to ensure that the product and the label continue to meet the requirements for sale in Canada, as outlined in the *Fertilizers Act* and *Regulations*.

Please note that any changes to the label, chemical composition, and/or the constituent materials of the product must be notified and submitted for approval to the FSS before implementation of the proposed change.

The FSS has recently reviewed and updated its policy regarding the submission of multiple packages sizes for a product registration. The CFIA no longer requires that all package sizes be approved in order to register or re-register a fertilizer or supplement. Therefore, applicants are

only required to submit one product label (of a single package size) with each application for registration or re-registration, as long as all label information is consistent between the various package sizes, with the exception of the declaration of net contents.

The FSS will accept re-registration submissions up to six months prior to expiration if there are no changes to the constituent materials or manufacturing process from the previous registration, and up to one year in advance if there are changes to the constituent materials or manufacturing process. The registrant must ensure that they are aware of the date that the product expires (found on registration certificate), and to submit their re-registration application on, or before, the stated expiry date.

Should you require assistance to submit a re-registration, please contact the Pre-market Application Submissions Office (PASO) by telephone at: 1-855-212-7695, by e-mail at: cfia.paso-bpdpm.acia@canada.ca (ensure the word "fertilizer" is in the subject line) or visit our website at the following: <http://www.inspection.gc.ca/english/plaveg/fereng/ferenge.shtml>

Please contact me should you have any questions regarding this registration letter.

Sincerely,

Derek Curley
Senior Evaluator
Fertilizer Safety Section
